Barangay

AI Report Summary

Period: October 30, 2026 to November 6, 2026
Reports analyzed: 7
Generated: November 6, 2026 1:53 PM

Overview

The latest seven reports cover infrastructure hazards, public safety concerns, and nuisance complaints affecting the barangay. Most issues are pending, with a few currently under review. The reports highlight problems on Rizal Street, Mabini Street, Purok 3 and 4, and the Barangay Hall Road.

Recurring Issues and Areas

- **Rizal Street (near Elementary School)** – live electric wires, stray dogs.
- **Barangay Hall Road** – streetlight outages (reported twice).
- **Mabini Street** – pothole and clogged canal causing flooding.
- **Purok 4** – noise nuisance from loud karaoke.

These locations are repeatedly cited, indicating a concentration of concerns in the central and northern parts of the barangay.

Most Urgent Items

- **#8 (2026-11-02)** – exposed live wires sparking near the elementary school gate; risk to children walking underneath.
- **#9 (2026-11-01)** – large pothole on Mabini Street; two motorcycles already slipped.
- **#10 (2026-10-30)** – clogged canal on Purok 3; knee-deep flooding during rain, blocking passage.
- **#16 & #15 (2026-11-01 & 2026-10-30)** – streetlight out in front of Barangay Hall for three days, creating a dark, potentially unsafe night environment.

These items involve immediate safety hazards and impede daily activities.

Suggested Priorities

1. **Electrical Safety** – Inspect and repair the exposed live wires (#8).
2. **Road Safety** – Fill the pothole on Mabini Street (#9) and clear the canal at Purok 3 (#10).
3. **Lighting** – Restore the streetlight on Barangay Hall Road (#15/#16).
4. **Public Health & Order** – Manage stray dogs near the school (#12) and address the noise nuisance on Purok 4 (#14).

Addressing the first three items will reduce immediate risk and improve safety for residents, especially children. The remaining issues should be scheduled for follow-up once critical hazards are resolved.
